In the Institute internship program, faculty members are expected to be mentors for students. Do you feel that your faculty coordinator served such a function? Why or why not?

Yes, my faculty coordinator served as a helpful mentor during the internship. They guided me in setting learning goals, supported me in aligning my tasks with academic expectations, and were available to clarify doubts whenever needed. Their involvement helped me stay focused and motivated throughout the internship period.

How well were you able to accomplish the initial goals, tasks and new skills that we reset down in your learning contract? In what ways were you able to take a new direction or expand beyond your contract? Why were some goals not accomplished adequately?

I was able to accomplish most of the initial goals and tasks outlined in my learning contract, including gaining hands-on experience with WordPress, improving design and layout skills using Elementor, and learning SEO techniques through Yoast. I also expanded beyond the contract by working on live website sections and managing performance optimization, which wasn't originally part of my scope. A few goals, such as exploring advanced plugin development, were not fully achieved due to time limitations and the focus on live project execution. Overall, the experience exceeded my expectations in terms of learning and exposure.

In what areas did you most develop and improve?

I developed the most in the areas of WordPress website management, responsive design using Elementor, and basic SEO implementation. I also improved my problem-solving skills, especially when dealing with plugin conflicts and layout issues, and enhanced my ability to work independently on real-world web projects.

What has been the most significant accomplishment or satisfying moment of your internship?

The most significant accomplishment of my internship was when I successfully redesigned the company's homepage and saw it go live on the official website. It was satisfying to know that my work directly contributed to improving the user experience and visual appeal of a real business platform. That moment gave me confidence in my skills and motivation to grow further in web development.

What did you dislike about the internship?

There wasn't anything major that I disliked

Considering your overall experience, how would you rate this internship? (Circle one).

(Satisfactory/ Good/ Excellent)

Give suggestions as to how your internship experience could have been improved.(Could you have handled added responsibility? Would you have liked more discussions with your professor concerning your internship? Was closer supervision needed? Was more of an orientation required?)

The experience could have been improved with more regular check-ins and feedback from both the mentor and faculty. A detailed orientation at the start would have helped me settle in faster. I also feel I was ready to take on a bit more responsibility.
